

**CAUSE ADVISORY**  
**CPRA - Information Request Submitted**  
**RE: Air Flow & Circulation in Enclosed Spaces**

=====

CUSD Employees, Parents, & Community Stakeholders,

Today, with the District's recommendation to reopen schools at 100% capacity, the attached information request has been submitted.

Union leadership recognizes that changes to the CDC's distancing guidelines (from 6 feet to 3 feet) do not resolve critical mitigation concerns associated with airborne viral load in enclosed spaces. If the District decides to reopen at 100% in the coming week/s, without further amending its air-circulation systems, it will likely increase the airborne viral load in any given classroom or enclosed space by at least a factor of 3.

Union Leadership believes this detail requires further consideration before a full reopening has been thoroughly considered. Therefore, the attached Public Request for Information has been submitted today.

We look forward to sharing the data upon its reception.

In Unity,

- j. Hotchner \* CAUSE President
